

IN2 visual search

Find fast images and videos

Experience image and video content

We deliver:

_A fast and reliable system for searching visual assets databases for similar images with an image as a query

_An advanced graphical user interface where you can sketch the image you are looking for and search for it

_Accessible presentation interfaces that fit to your workflow and interaction requirements.

_Interfaces to adjust query terms according to your specific search requirements

_Combined visual and textual search capabilities for refining your query

_Increased productivity by reducing time needed from picture shooting to web selling

_Comfortable and simple adaptation to your specific system requirements and seamless integration into your existing web offering
